

Anmol Upadhyay

Java Full-Stack Developer | DSA Enthusiast

Satyajeet7457@gmail.com | +91-7457924494 | Noida, Uttar Pradesh, India | LinkedIn-Anmol-upadhyay

PROFESSIONAL SUMMARY

Java Full-Stack Developer with strong understanding of Data Structures & Algorithms and hands-on experience in building scalable applications using Java, Spring Boot, Spring Framework, Hibernate, JDBC, Servlets, and REST APIs. Familiar with frontend technologies including React.js, JavaScript, HTML, and CSS, along with MySQL for database management. Good knowledge of core Java concepts such as OOP, Multithreading, Exception Handling, and File Handling. Interested in writing clean, secure, and optimized code, and looking to contribute as a backend-focused full-stack developer in real-world projects.

EXPERIENCE

Java Full-Stack Developer (Trainee)

08/2025 – 04/2026

JSpiders-Training & Development Center

Noida

- Developed and maintained backend features using Java and Spring Boot for handling client requests and business logic.
- Developed 10+ REST APIs for CRUD operations, reducing data fetch time by 30% and integrated them with frontend applications.
- Designed responsive UI components using HTML, CSS, JavaScript, and React.js.
- Worked with Java Servlets to handle HTTP requests and integrated them with frontend to ensure smooth data flow and application functionality.
- Worked with MySQL database, performed DML and DQL operations (INSERT, UPDATE, DELETE, SELECT) and handled basic database management tasks.
- Implemented login functionality and basic authentication using Spring Security and JWT.
- Used Git and GitHub for version control, managing code changes and collaboration.
- Debugged application errors and fixed issues to improve performance and stability.
- Assisted in testing, deployment, and participated in Agile meetings and team discussions.

PROJECTS

Employee Management System (JDBC → Hibernate → Spring Boot)

- Developed a Full-Stack Employee Management System implementing CRUD operations using JDBC with MySQL for direct database interaction.
- Enhanced the application by integrating Java Servlets and frontend technologies to build a dynamic web-based interface.
- Refactored the project using Hibernate (JPA) to replace SQL queries with ORM handling and improve code maintainability.
- Extended the application using Spring Boot in STS to develop RESTful APIs with a scalable and layered architecture.
- Demonstrated strong understanding of backend evolution from JDBC to ORM and modern frameworks.
- Built the same system using different technologies to understand the evolution from JDBC to Hibernate to Spring Boot.

E-Commerce Product Management System

- Developed a Full-Stack web application using Java Servlets for backend processing and Hibernate (JPA) for ORM-based database interaction with MySQL, following MVC architecture for clean separation of concerns.
- Implemented CRUD operations using Java, Collections Framework, and SQL queries across multiple product categories (Shirt, Laptop, Mobile, AC, etc.) with normalized database design and separate relational tables.
- Designed a dynamic and responsive user interface using HTML, CSS, and JavaScript, incorporating DOM manipulation and form validation to handle category-based field rendering.
- Utilized Hibernate annotations and entity relation to manage data and mapping between Java objects and database tables.
- Deployed and tested on Apache Tomcat server, ensuring proper exception handling and end-to-end functionality.

TECHNICAL SKILLS

CORE JAVA: OOPs, Collections Framework (List, Set, Map), Multithreading, Exception Handling, File Handling, String Manipulation, Java 8 (Lambda, Streams)

ADVANCE JAVA: Spring Boot, Spring Framework (Core, MVC, Security), Hibernate (JPA), JDBC, RESTful APIs, Maven

FRONTEND: HTML5, CSS3, JavaScript, React.js

DATABASE: MySQL, Oracle, MongoDB (basic)

DSA: Arrays, String, Linked Lists, Stack, Queue, Trees, Graphs, Recursion, Sorting & Searching Algorithms, Hashing (HashMap, HashSet), Time & Space Complexity (Big-O)

Tools: Git, GitHub, Eclipse, VS Code, Spring Tool Suite (STS)

EDUCATION

Bachelor of Technology – Computer Science & Engineering

2021 – 2025

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

High School & Intermediate

2019 – 2021

Maharishi Vidya Mandir Senior Secondary School

CERTIFICATE

Certified (Training Program) by JSpiders, Noida (April 2026)

Completed training in Java Full Stack Development
